Weekly Meetings Report

20 February 2015

Discussed Topics

1. **Algorithm Implementation**
   The current state of the BM3D algorithm implementation on MATLAB, completed in the 1st semester, was discussed with Professor Xin Li. As there were problems with the Wiener Filtering part, Professor Li suggested to contact the authors of the original BM3D paper.

Next tasks

1. **Finish Algorithm Implementation**
   For next week the plan is to finish the BM3D implementation in MATLAB and set up the working environment for the hardware implementation.
