Papers are solicited in the following and related areas: Energy and Environment, Heat pump and refrigeration systems, Co-generation, Thermal power systems, Energy sources and sustainability. Papers concerning computational and experimental methods in all fields of thermal sciences are also welcome such as: Computation and Experimental Fluids Dynamics, Heat and mass transfer, Fluid Mechanics, rheology, combustion, heat transfer, thermal machines, ventilation, materials processing technologies under thermal conditions, mixed numerical and experimental optimal design of thermal systems, solar systems, data acquisition based on artificial neural networks, and indoor air quality. Papers based on reliability and failure of thermal systems of any kind are also most welcome.

Extended abstracts of **two full pages** should be written in the same format as the full papers for the CD-ROM (no limitation in length for these):

and in alphabetical order of first author's name. Always give inclusive page numbers for references to journal articles and a page range for books. Each reference must be cited in the text.

A sample abstract is available for download at:

http://paginas.fe.up.pt/clme/IRF2016/abstract_sample.doc

which can also be used as template.

The *Extended Abstracts* are due by **11 JANUARY 2016**, and those accepted will appear in a book which will be made available to delegates of IRF 2016 during the event.
