## SSCR 2012

1<sup>st</sup> Symposium on Subsoil  
Characterization and  
Remediation

**Organizers:**

# Final Call for Abstracts

## Scope

The objective of the symposium is to bring together scientists, engineers, post-graduate students, authorities and professionals to present their findings and discuss new trends and new challenges in contaminated soils and groundwater: sampling, space-time characterization, management and risk assessment and remediation.

## Topics

- Geostatistical characterization of subsoil contamination.
- Modeling the space-time distributions of contamination.
- Quantitative risk assessment.
- Subsoil remediation – in-situ chemical / biological technologies.
- Subsoil remediation – physical / thermal technologies.

Presentations will be in English or Portuguese.
