# WEEKLY REPORT

23<sup>RD</sup> MAY – 27<sup>TH</sup> MAY

## TASKS PERFORMED / TOPICS STUDIED:

- Construction and test of the printed circuit boards designed for signal condition (continuation);
- Implementation of the entire protocol created on the Wasmote devices. It is now possible to test the entire network using this protocol;
- There are still bugs when transmitting some of the messages; therefore most of the week was spent trying to fix these problems.

## BIBLIOGRAPHY REVISED:

- AT90CAN64 – datasheet;
- Wasmote – Technical Guide by Libelium ;
- Analog Devices – AD623 datasheet;
- OPA2350 – datasheet.
