WEEKLY REPORT

30TH MAY – 3RD JUNE

TASKS PERFORMED / TOPICS STUDIED:

- The week was spent assembling the entire system. It was expected that by this type laboratory tests could be made, however some important bugs are still without solution;
- As it was said, there are still problems on the system implementation, so most of the time was used trying to solve them.

BIBLIOGRAPHY REVISED:

- AT90CAN64 – datasheet;
- Waspmote – Technical Guide by Libelium ;
