

Universidade do Porto

FEUP Faculdade de Engenharia

WEEKLY REPORT

6TH MAY – 6TH JUNE

TASKS PERFORMED / TOPICS STUDIED:

- These last two days were used to test the complete system in LABEST;
- A metallic plate with sensors was used. Different tests were made to the metallic plate and monitored by the prototype developed;
- The results are not great however it is possible to validate the entire concept;
- Next weeks will be spent writing the dissertation document. Therefore, no progress on the system development is expected.

BIBLIOGRAPHY REVISED:

- AT90CAN64 – datasheet;
- Waspnote – Technical Guide by Libelium ;
