

## 6th Meeting

**Place:** INESC Porto

**Date:** 28/03/2014

**Time:** around 12:00

### Participants:

Student: Ana Carolina Janeiro

Co-supervisor: Maria Teresa Bianchi de Aguiar

### Discussion:

Prepare an abstract explaining the work being developed to submit for presenting at the Optimization 2014 Conference, in Guimarães.

Instructions about the work to be developed next week.

### Decisions:

- The abstract for the conference was submitted;
- Next week, the work will be focused on improving the solution found for the problem, by:
  - changing the fitness function, to penalize deviations from targets and space left empty;
  - adding an element to the chromosome to randomly decide the space in the shelf that will be left empty within limits;
  - making changes to accelerate the implementation, through an eventual reduction of the chromosome and other improvements in the code.
