

Table of contents:

Preface	VII
1. Systems and Models	1
1.1 KIND OF MODELS	2
1.2 CONCEPTUAL MODELS	4
1.3 CONTINUOUS SIMULATION	6
1.4 STATISTIC SIMULATION	10
1.5 RANDOM NUMBERS	12
1.6 TURNING THE MODEL STOCHASTIC	14
1.6.1 Histogram Sampling	16
1.6.2 Distributions Sampling	18
1.6.3 Uniform Distribution	19
1.6.4 Negative Exponential Distribution	20
1.6.5 Normal Distribution	21
1.7 GETTING RESULTS WITH THE MODEL	23
2. Discrete Simulation	29
2.1 BRIEF HISTORICAL	31
2.2 ELEMENTS OF DISCRETE SIMULATION	33
2.2.1 Entities	34
2.2.2 Activities	35
2.2.3 Events	38
2.2.4 Entity queues	40
2.3 ACTIVITY CYCLES	41
2.3.1 Relation with event sequences	43
2.4 TIME ADVANCING TECHNIQUES	44
2.4.1 Time Slicing	45
2.4.2 Next event	47
2.5 CONCEPTION AND CREATION OF THE MODEL	48
2.5.1 Diverse approaches	48
2.5.2 Structure of a discrete simulator	49
3. Activity approach	53
3.1 THE OPERATIONS SECTION	53
3.1.1 Activity routines	53
3.1.2 Time cells	55
3.1.3 The haircutter case	56
3.1.4 Data sampling	60
3.2 THE EXECUTIVE	61
3.2.1 Basic cycle	61
3.2.2 Improved cycle	63
3.3 ABOUT THIS APPROACH	65
4. Event approach	67
4.1 THE OPERATIONS SECTION	67
4.1.1 Event routines	67
4.1.2 The haircutter case	69
4.1.3 Data sampling	73
4.2 THE EXECUTIVE	74

4.2.1	<i>The simulator cycle</i>	74
4.2.2	<i>The Schedule() function</i>	78
4.3	ABOUT THIS APPROACH.....	79
5.	Process approach	83
5.1	THE OPERATIONS SECTION	85
5.1.1	<i>Process structure</i>	85
5.1.2	<i>The haircutter case</i>	86
5.1.3	<i>Splitting one process into two</i>	89
5.1.3	<i>Data sampling</i>	90
5.2	THE EXECUTIVE	91
5.2.1	<i>Present and future event lists</i>	91
5.2.2	<i>The simulator cycle</i>	92
5.3	ABOUT THIS APPROACH.....	94
6.	Three phase approach	97
6.1	THE OPERATIONS SECTION	98
6.1.1	<i>B and C activities</i>	98
6.1.2	<i>The haircutter case</i>	100
6.1.3	<i>Data sampling</i>	102
6.2	THE EXECUTIVE	103
6.3	ABOUT THIS APPROACH.....	105
7.	Creating models I	109
7.1	CROSSING A RIVER WITH LITTLE CANOES	110
7.1.1	<i>Description of the problem</i>	110
7.1.2	<i>Identifying entities and activities</i>	110
7.1.3	<i>Model implementation</i>	113
7.1.4	<i>Simulating the model</i>	115
7.2	A LITTLE AIRPORT	117
7.2.1	<i>Description of the problem</i>	117
7.2.2	<i>Identifying entities and activities</i>	118
7.2.3	<i>Model implementation</i>	122
7.3	A PRODUCTION EXAMPLE	129
7.3.1	<i>Description of the problem</i>	129
7.3.2	<i>Creating the model</i>	130
7.3.3	<i>Model implementation</i>	132
7.4	SOME NOTES CONCERNING THESE MODELS	138
8.	Creating models II	143
8.1	INTRODUCTION TO SIMPROCESS®	144
8.2	CREATING THE MODEL IN THE SIMULATOR	145
8.2.1	<i>Model representation</i>	145
8.2.2	<i>Creating the active entities</i>	149
8.2.3	<i>Giving processes to the active entities</i>	151
8.3	MODEL SIMULATION AND RESULTS	154
9.	Event Simulation using C	159
9.1	ENTITIES, ACTIVITIES AND EVENTS	160
9.1.1	<i>The entities</i>	160
9.1.2	<i>The activities</i>	162
9.1.3	<i>Events and Event List</i>	163
9.2	ABOUT THE LISTS OF POINTERS "CPTRLIST"	164
9.3	SCHEDULING EVENTS.....	165
9.4	EXECUTING EVENTS.....	167
9.5	THE EXECUTIVE	168

9.6 THE MAIN PROGRAM "MAIN()"	169
9.7 VISUAL AND INTERACTIVE ASPECTS.....	170
9.8 EXAMPLES OF SIMULATORS	171
9.8.1 <i>An hydroelectric network simulator</i>	171
9.8.2 <i>An warehouse simulator</i>	174
10. Object Oriented Simulation	179
10.1 CONCEPT OF CLASS AND ITS USAGE IN C++	180
10.2 ENTITIES AND EVENTS.....	183
10.2.1 <i>Entity prototype</i>	184
10.2.2 <i>The events</i>	189
10.3 THE SIMULATOR OBJECT	189
10.3.1 <i>Moving entities in the display</i>	190
10.3.2 <i>The activities</i>	192
10.3.3 <i>The Event List</i>	193
10.3.4 <i>Scheduling events</i>	194
10.3.5 <i>Executing the events</i>	195
10.3.6 <i>The executive</i>	196
10.4 THE MAIN PROGRAM "MAIN()"	197
10.5 USING THE MICROSOFT VISUAL C++	199
10.5.1 <i>A "basic application"</i>	200
10.5.2 <i>Including the simulator code into the "basic application"</i>	201
10.5.3 <i>Start simulation code</i>	202
10.5.4 <i>Visual elements of the simulator</i>	204
10.5.5 <i>Interactions with the model</i>	207
11. Some Object Oriented simulators	211
11.1 A WAREHOUSE SIMULATOR.....	212
11.1.1 <i>Components of the simulator</i>	212
11.1.2 <i>Model structure</i>	214
11.1.3 <i>Model simulation</i>	215
11.1.4 <i>Results</i>	217
11.2 A TRAFFIC SIMULATOR	218
11.2.1 <i>The model</i>	220
11.2.2 <i>Model simulation and results</i>	222
11.3 A SUPPLY CHAIN SIMULATOR	223
11.3.1 <i>General aspects of the simulator</i>	224
11.3.2 <i>About the model</i>	226
Appendix 1	
Some WEB addresses with interest for simulation:	229
C code to simulate a haircutter:	231
Some routines in C to handle queues:	234
Index	237
