

LPRO 2013/2014

Master in Electrical and Computers Engineering
Programming Laboratories
Instance: 2013/2014

Programming Laboratories (Laboratório de Programação)

This course aims to promote the acquisition of concepts, methods and techniques of software engineering and provide students the ability to apply them in the design and development of software systems, by the use of software development tools in the development of the product throughout its life cycle, including debugging, testing and documentation of code in the Java programming language.

"Students are responsible for anything that transpires during a class—therefore if you're not in a class, you should get notes from someone else (not the instructor)." David Maier

General Information

- Course Unit: [English](#) ([Português](#))
- Contents: [Final](#) (Sumários)
- SIGARRA: [English](#) | [Português](#) | [Students](#) | [Photos](#) | [Classes](#) | [Schedule](#) | [Lectures \(B018\)](#)
- Coordinator: [João Correia Lopes](#)
- Attendance hours: Fridays, 14:00 ~ 15:30, [I129](#).
