Highlights on Practical Applications of Agents and Multi-Agent Systems

10th International Conference on Practical Applications of Agents and Multi-Agent Systems

Springer
PAAMS'12 Special Sessions are a very useful tool in order to complement the regular program with new or emerging topics of particular interest to the participating community. Special Sessions that emphasized on multi-disciplinary and transversal aspects, as well as cutting-edge topics were especially encouraged and welcome.

Research on Agents and Multi-Agent Systems has matured during the last decade and many effective applications of this technology are now deployed. An international forum to present and discuss the latest scientific developments and their effective applications, to assess the impact of the approach, and to facilitate technology transfer, has become a necessity.

PAAMS, the International Conference on Practical Applications of Agents and Multi-Agent Systems is an evolution of the International Workshop on Practical Applications of Agents and Multi-Agent Systems. PAAMS is an international yearly tribune to present, to discuss, and to disseminate the latest developments and the most important outcomes related to real-world applications. It provides a unique opportunity to bring multi-disciplinary experts, academics and practitioners together to exchange their experience in the development of Agents and Multi-Agent Systems.

We would like to thank all the contributing authors, as well as the members of the Program Committees of the Special Sessions and the Organizing Committee for their hard and highly valuable work. Their work has helped to contribute to the success of the PAAMS’12 event. Thanks for your help, PAAMS’12 wouldn’t exist without your contribution.
We thank the sponsors (IEEE Systems Man and Cybernetics Society Spain, AEPIA Asociación Española para la Inteligencia Artificial, APPIA Associação Portuguesa Para a Inteligência Artificial, CNRS Centre national de la recherche scientifique), the Local Organization members and the Program Committee members for their hard work, which was essential for the success of PAAMS’12.

## Contents

### COREMAS: COoperative and RE-configurable Multi Agent System for Manufacturing, Logistics and Services Domains in Industry

**Multilevel MAS Architecture for Vehicles Knowledge Propagating**  
*Emmanuel Adam, René Mandiau, Emmanuelle Grislin*  
1

**Nervousness in Dynamic Self-organized Holonic Multi-agent Systems**  
*José Barbosa, Paulo Leitão, Emmanuel Adam, Damien Trentesaux*  
9

**A Typology of Multi-agent Reorganisation Approaches**  
*Emmanuelle Grislin-Le Strugeon*  
19

### BioMAS: 3rd International Special Session on Bio-Inspired and Multi-Agents Systems: Applications to Languages (BioMAS)

**Towards a Meta-model for Natural Computers: An Example Using Metadepth**  
*Marina de la Cruz, Suzan Awinat*  
29

**Towards the Automatic Programming of NEPs: A First Case Study**  
*Emilio del Rosal, Alfonso Ortega, Marina de la Cruz*  
37

**A Grammar-Based Multi-Agent System for Language Evolution**  
*Mª Dolores Jiménez-López*  
45

**On the Syntax-Semantics Interface of Argument Marking Prepositional Phrases**  
*Roussanka Loukanova, Mª Dolores Jiménez-López*  
53

**Overview of the Fault and Bad Language Tolerance in Automatic User-Agent Dialogues**  
*Diana Pérez-Marín*
