Abstract

The oestros ‘community lab’ is a complement to the ‘Systems Planner’ document series.

1 About

THE SERIES ‘oestros’ is a ‘community lab’, named after a Socratic metaphor and corresponding practice used for stimulating critical thinking and social awareness. Its themes are about science and society (Figure 1), and can later serve as case studies for Systems Planning.

PUBLICATION MODEL ‘oestros’ documents are prepared and released on the model of the ‘Systems Planner’ series (Perdicoulis, 2011).
